# YouthServices.net

## For GEAR UP Programs

YouthServices.net for GEAR UP is designed for school districts and their partners participating in the Federal GEAR UP program. The system helps track and evaluate the progress of participating students and captures the involvement of their support network.

YouthServices.net for GEAR UP provides a single hub for maintaining all information related to a studentÍs academic achievement.

### **REGISTER AND ENROLL STUDENTS**

YouthServices.net for GEAR UP guides users through the process of registering students. The system collects basic demographics, such as name, address, and emergency contacts, as well as outcome information such as graduation dates and college attendance. Once registered, students may be enrolled in individual services such as tutoring, or group activities such as classes.

## TRACK ATTENDANCE AND PROGRESS

YouthServices.net for GEAR UP enables users to maintain detailed information on each participant. Using the software, GEAR UP program staff can record attendance for all individual and group activities, as well as a five-year academic picture for each student. The system tracks GPAs, exam scores, courses taken and educational progress. Several tools support data collection, including pre-printed attendance forms and options that integrate wireless and PDA technologies. In addition, YouthServices.net for GEAR UP can be linked to a school districtÍs student registration system, enabling transfers of student data between systems.

### MANAGE THE SUPPORT NETWORK

One of the key elements of GEAR UP is the involvement of the programÍs support network. With YouthServices.net for GEAR UP, users can maintain a variety of data related to staff, parents and partner agencies. Staff forms record staff names, addresses, schedules of availability and pre-qualification information. Parents that participate in activities—either individual counseling or group courses—are tracked in the system as well. Partner agencies are categorized by type, e.g. school, service provider or funder, and information such as agency names, addresses, contacts and organizational descriptions is captured.

### **CREATE REPORTS**

With YouthServices.net for GEAR UP, users can automatically generate Annual Performance Review (APR) reports based on participant and service data. GEAR UP programs can also create statistical reports for presentation to funders, evaluators and others. The reports calculate average daily attendance, participation by service category and overall participant demographics. The system also generates enrollment lists, mail labels, contact sheets and attendance forms that facilitate the day-to-day management of services.

### **ANALYZE OUTCOMES**

YouthServices.net for GEAR UP enables users to generate reports that help them evaluate the effectiveness of different programs and service offerings. The system captures GPAs, test scores and grades directly on a participant record, thus allowing for analyses that relate program elements, such as participation frequency, to student performance. Other features that facilitate outcomes analysis include standardized evaluation forms, user-defined assessment forms and unique fields, such as school ID or social security number, which can link client data to external data sets.

### ABOUT THE TECHNOLOGY

YouthServices.net technology is the product of ten years of sustained development. Our software is implemented using advanced Microsoft web technologies, features an XML configuration layer, and is delivered through a web browser interface. Our servers and network infrastructure are designed for high performance and availability.

### ABOUT SECURITY

YouthServices.net maintains the highest levels of system security and client confidentiality. A 128-bit secure socket layer (SSL) protects client-server communications; security professionals configure and audit our production servers; and backups and data-storage protocols incorporate state-of-the-art mirroring and encryption technologies. YouthServices.net actively monitors and enforces HIPPA and FERPA compliance policies that ensure client confidentiality.
